WORKING EXPERIENCE

THE GLOBAL FUND ○ GRANT MANAGEMENT

Program Officer

Jul. 24 – Ongoing
Geneva, Switzerland

Portfolio Reporting & Program Management

- Business Intelligence: Develop and deliver insight reports to senior leadership to enable proactive monitoring of grants, trend analysis and process improvements and prioritization across portfolios (\$2.9 billion allocation).
- Program Management: Coordinate grant lifecycle processes, including budget reviews, disbursement requests, and work plans, ensuring compliance with organizational objectives.
- Risk Management: Identify and mitigate grant risks, ensuring data integrity and adherence to policies.

Business Process Reporting Officer

Jun. 22 – Jul. 24

Analytics for Grant Portfolio Efficiency

- Developed BI frameworks using Python and Salesforce Analytics, enhancing strategic reporting and decision-making processes for senior management and policy hubs.
- Process Optimization and Strategic Enhancements: Led the optimization of grant lifecycle processes by capturing business requirements and translating into functional specifications.

CEPHEID ○

Danaher Group Lead

Program Manager
Nov. 20 – Jun. 22, Remote

PROGRAM INTELLIGENCE | Financial Oversight & Governance Excellence

- Management of AccessCare program (\$8 million): financial, schedules, risks, contracts and maturity road map
- Developed reports and dashboards (Python, PowerBI DAX) to monitor program financials, including Earned Value Management (EVM) for cost performance and project progress, baseline budgets and cost-to-completion projections to ensure accurate Actual vs. Budget reporting and provide variance analysis to senior leadership.
- Implemented a program standardization and governance framework, incorporating DBS Toll-Gate reviews for project lifecycle management with Phase Gate methodology, and structured Country Reviews & Steering Committee sessions to ensure consistent project oversight, risk management, and alignment.

UNITED NATIONS ○

Information Management Specialist

May – Nov. 20, Remote

INFORMATION MANAGEMENT | Analytics for the Resident Coordinator Office

- Conducted analysis (Python) in support of resource mobilization for the UN agencies, program advocacy and strategic decision-making for the UN System.
- Produced reports on Sustainable Development Goals of the 2030 Agenda to inform strategic decision-making and policy development.

THALES ○

In-Country Project Manager

Jan. 18 – Jan. 20
New Delhi, India

PROGRAM MANAGEMENT AND SYSTEM DESIGN

Projects implementation & analytics

Led India support programs in liaison with France PMO:

- Managed projects oversight: financial planning, budgeting, and forecasting for project delivery, risks & opportunities, statement of work and technical proposal, customer relationship (Govt. and private).
- Evaluated the organizational distribution and operations across India, conducting business analyses (Python) to identify opportunities based on regional assets and operational dynamics.

Service Delivery Manager

Sep. 16 – Nov. 17
Bordeaux, France

System design for service availability

Managed the rollout of a testing bench for fighter jets autopilot systems in India:

- Designed a supply chain model to respect the contractual system availability commitment.
- Developed an IT solution between the France and New Delhi offices to streamline spare parts logistics, monitor program financials, and automate KPI generation for enhanced operational efficiency.

AIRBUS ○

Analyst trainee

Jan. – Jul. 16, France

BUSINESS ANALYSIS | Simulation and Predictive Analytics

Performed a profitability analysis for the creation of a performance simulation department, evaluating costs, expected savings, and ROI through financial modeling to optimize logistics schemes (OPUS & SIMLOX).

IT SKILLS

- PROGRAMMING Python for Data Science, SQL, VBA
- DATA PROCESSING Pandas, Dax, Salesforce recipes
- DATA VISUALIZATION Power BI, Tableau, Salesforce Analytics Studio, Python libraries (Plotly, matplotlib, seaborn)
